Many Rumors of Impend-

the Air

Washington, D. C., Feb. 8.—This city  
extended the hand of welcome to base-  
ball magnates of the American league  
to-day for their first meeting outside  
of New York or Chicago in the history  
of the organization. Clark Griffith,  
president of the Washington club, had  
arranged for the club owners and offi-  
cials to pay their respects to Presi-  
dent Harding at the White House be-  
fore beginning their sessions later in  
the day.

The meeting was called for the spe-  
cific purpose of ratifying the 1922 play-  
ing schedule, but it was believed it  
would not adjourn without some dis-  
cussion of plans for effecting restora-  
tion of the draft, now opposed by sev-  
eral of the minor leagues. Many ru-  
mors of impending trades of players  
for which the gathering would afford  
opportunity for direct negotiation also  
came to town with the magnates.

are usually due to straining  
when constipated.

Nujol being a lubricant keeps  
the food waste soft and there-  
fore prevents straining. Doctors  
prescribe Nujol because it not  
only soothes the suffering of  
sufferers but relieves the irritation,  
brings comfort and helps to re-  
move them.

Nujol is a lubricant—not a  
medicine or laxative—so cannot

cago Nationals, following an order is-  
sued to-day by President Veeck that

### MEASURING HEIGHT OF CLOUDS.

New Plan to Help Airmen on Night  
Service.

A method of finding the height of the  
clouds for the information of night fly-  
ing airmen is to be tried at the London  
air station, Croydon. It consists pri-  
marily of a powerful searchlight throw-  
ing a vertical beam on the clouds and  
a specially designed theodolite look-  
ing through which to observe the beam.

The searchlight and theodolite are set  
up a measured distance apart. The  
theodolite is mounted in such a way  
that the angle at which its telescope is  
pointing can be read with minute ac-  
curacy on a special scale. It is set so  
that the point where the searchlight  
beam enters the clouds can be seen in  
the center of the telescope.

The angle is then read and the distance  
between searchlight and theodolite be-  
ing known, it is simple mathematical  
problem, to calculate the height of the  
clouds.

The apparatus is self-contained and  
portable. A twin cylinder petrol en-  
gine with electric dynamo, switchboard,  
petrol and oil tanks attached provides  
the electricity for the searchlight, and  
the whole apparatus can be easily  
carried by two men. Both the theod-  
olite and the searchlight, which  
throws a beam of 500,000 candlepower  
are mounted on folding tripod.

It is proposed, as soon as tests are  
satisfactorily completed, to install sets  
of apparatus at various wireless station  
along the airway, so that a pilot of a  
night express can while in the air be  
accurately informed of the height of  
the clouds on each portion of his route  
as he approaches it.—London Times.

tor's seat."—Philadelphia Record.

# The Daily Newspaper is an Instant Force

WISE national advertisers are not  
making long-time commitments  
these days. Conditions are changing too  
rapidly.

What may have been a bad market yes-  
terday may be a good one to-morrow.

What might be a fair  
price to-day may be low or  
high a week hence.

Alert merchandisers are  
marshalling their selling  
forces so they can have the  
right men on the right spot  
at the right moment.

In times like these there's  
no force so adaptable to the  
problems of the manufact-  
urer or national distribu-  
tor as newspaper advertis-  
ing.

The national newspaper  
advertiser can change his  
appeal overnight. He can

move from one market to  
another instantly.

He can start here or stop  
there. He can make every  
advertising dollar count  
one hundred cents efficien-  
cy.

In no other medium ex-  
cept the daily newspaper  
can he have like advantages.

The daily newspaper is  
the medium of complete  
adaptability, just as it is  
the medium of immediate  
results.

Manufacturers and distributors interested in  
the problems of modern merchandising are in-  
vited to write to the Bureau of Advertising, 202  
World Building, New York, for a copy of the  
book, "National Advertising and the Newspapers."
